

A)

Functional capacity

- | | |
|---------------------------------|---------------------------------------|
| 1:Antibiotic Degradation | 8:Lipid Degradation |
| 2:Xenobiotic Degradation | 9:Aromatic Compound Biosynthesis |
| 3:Alcohol Degradation | 10:Vitamin Biosynthesis |
| 4:Nitrogen Compound Degradation | 11:Organic Anion Biosynthesis |
| 5:Amino Acid Degradation | 12:Scfa Biosynthesis |
| 6:Sugar Degradation | 13:Amino Acid Derivative Biosynthesis |
| 7:Polysaccharide Degradation | 14:Amino Acid Biosynthesis |

B)

Functional completeness
